Cassava Grater Machine

Processing Capacity: 3-6Tons/hour

Application Scope: Grating the cassava into slurry

Product Introduction: Cassava grater machine, cassava grating machine, cassava grinder, cassava grinding machine for cassava flour and garri processing

Product Description of Cassava Grater Machine

Cassava grater machine adopts two level pulverizing, the first level is rasp-type pulverizing, and the second level is hammer-type pulverizing, the combination of two levels sufficiently makes up their individual defects. It can be used for grating raw materials such as cassava, potato, sweet potato, yam etc. The efficiency can be improved by 45%-90%

comparing to universal hammer mill.

Product Features of Cassava Grater Machine

1. The pulverizing cavity looks like a dropping cave, which can prevent the circumfluence of the raw material.
2. The hidden rotors can pulverize the materials completely.
3. Two level pulverizing: rasp-type and hammer-type pulverizing with super efficiency.
4. The distance between sifter and sinker is adjustable, which can make rough pulverizing, fine pulverizing and micro pulverizing are available in one machine.
5. Easy-open door makes maintains convenient.
6. Sieve will be bounded up after pressing. This enables the replacement much easier, and can close much tighter.

Technical Parameters of Cassava Grater Machine

Model No.	GD-G-660	GD-G-900
Capacity	3Tons/Hour	6Tons/Hour
Voltage	380V & 50/60Hz 3Phase	380V & 50/60Hz 3Phase
Power	11KW	15KW
Weight	350KG	450KG
Dimension(L ×W ×H)	1300×1000×1400mm	1300×1300×1400mm
